

NORTH BERKELEY

PLANNING The City of Berkeley is working with neighborhood residents in efforts to increase safe access to BART. A major citywide initiative to create bicycle boulevards now provides direct access routes to the North Berkeley BART Station.

ACCESS IMPROVEMENTS Currently, 114 new bike racks have been installed. This station is slated for new, ADA-compliant platform edge tiles in 2004.

REINVESTMENT This station had new, energy efficient lighting fixtures and lamps installed throughout the station parking lot in 2003 and is scheduled to have energy efficient lighting fixtures and lamps installed within the station itself in 2004, as part of ongoing station renovation program activities.
